

HOLY GRACE ACADEMY OF ENGINEERING

INTRODUCTION

Holy Grace Foundation, established in 1999, is a registered charitable and educational society committed to providing value-based and globally relevant education. With a clear vision of nurturing competent professionals and responsible citizens, the foundation has developed the Holy Grace Group of Institutions into a well-known educational hub in Kerala. The group emphasizes not only academic excellence but also moral values, discipline, and overall personality development, ensuring that students are prepared to meet both national and international challenges.

The Holy Grace Academy, founded in 2000, is an English-medium, co-educational CBSE residential school that has shown remarkable growth from its humble beginning of 135 students and 15 staff members to a large institution with around 3000 students and 300 staff. The school is known for its innovative teaching methodologies, including smart classrooms and a specially designed Smart Kindergarten for Pre-KG, LKG, and UKG students. This system focuses on activity-based learning, reducing academic pressure, and making education enjoyable and engaging for young learners. The school also promotes co-curricular and extracurricular activities such as sports, arts, and cultural programs to ensure holistic development.

In the field of higher education, the Holy Grace Academy of Management Studies plays a significant role in delivering quality management education. The institute is internationally recognized, being accredited by the International Accreditation Organization and the

Accreditation Council for Business Schools and Programs. It is approved by the All India Council for Technical Education and affiliated with the University of Calicut. Additionally, it holds an “A” rating from the All India Management Association and is ranked among the top MBA colleges in India. The institute focuses on developing managerial skills, leadership qualities, entrepreneurial thinking, and research capabilities through case studies, seminars, internships, and industry interaction.

The Holy Grace Academy of Engineering offers undergraduate engineering programs in key disciplines such as Civil Engineering, Computer Science Engineering, Electronics and Communication Engineering, and Electrical and Electronics Engineering. The college follows an industry-oriented curriculum that combines university syllabus with additional skill-based modules. It provides modern laboratories, experienced faculty from reputed institutions, and opportunities for students to participate in workshops, internships, and industrial visits both in India and abroad. This approach helps students gain practical knowledge and enhances their employability.

Apart from academics, the Holy Grace Group strongly believes in holistic development. It encourages students to participate in sports, cultural activities, social service, and personality development programs. The institutions maintain a disciplined and supportive environment that fosters creativity, teamwork, and leadership. With its continuous growth, modern infrastructure, global exposure, and commitment to excellence, the Holy Grace Group of Institutions stands as a prominent center for education, shaping the future of thousands of students every year.

Mission

Holy Grace Academy of Engineering (collage) in Thrissur aims to groom a new generation of highly qualified and ethically driven professionals who will serve society in new and innovative ways through their creative ideas and executions.

Vision

Holy Grace Academy of Engineering strives to develop our students to become innovators and thought leaders by imparting a rigorous training programme that utilizes academic, co-curricular, personality development, and the latest pedagogical and technological skills.

Governance and administrative structure

Campus (Collage) location and accessibility

The Holy Grace Academy of Engineering is Located in Mala, a scenic town in the Thrissur district of Kerala, and is known for its calm, green, and eco-friendly surroundings that are highly conducive to academic excellence. The campus or collage is thoughtfully located away from the distractions of busy urban centers, offering students a peaceful atmosphere that supports concentration, creativity, and overall well-being. The natural environment, enriched with greenery and open spaces, contributes to a healthy and refreshing learning experience, making it an ideal place for higher education.

Location and nearby facilities

Despite its serene setting, the institution enjoys excellent connectivity. It is well linked by road networks with nearby towns such as Chalakudy, Kodungallur, and Thrissur through frequent public and private bus services to collage location. This ensures that students from different parts of the district can commute easily and affordably. The proximity to Chalakudy railway station further enhances accessibility, providing rail connectivity to major cities across Kerala and neighboring states. Additionally, the Cochin International Airport, located within a convenient distance, facilitates national and international travel for students, faculty, and visitors, thereby supporting global exposure and outreach.

The surrounding locality is well developed and student-friendly, offering essential amenities such as hospitals, pharmacies, banks, ATMs, hostels, rental accommodations, and shopping centers. These facilities ensure that students have easy access to healthcare, financial services, and daily necessities without difficulty. The presence of such infrastructure enhances the overall convenience and comfort of campus or collage of holy grace life.

Within the campus or collage, infrastructure is systematically planned to ensure efficiency and safety. It includes well-maintained internal roads, adequate parking facilities, pedestrian pathways, landscaped gardens, and clearly marked zones for academic and administrative activities. The campus is designed to support both academic and extracurricular engagement, providing a balanced environment for learning and personal growth. Advanced security measures, including CCTV surveillance, security personnel, and controlled entry points, are implemented to maintain a safe and secure atmosphere for all students and staff.

Furthermore, the institution promotes a disciplined and organized campus culture, where safety, cleanliness, and accessibility are given high priority. The peaceful surroundings, combined with modern infrastructure and strong connectivity, make Holy Grace Academy of Engineering not only a center for technical education but also a comfortable and secure place for students to live, learn, and grow.

Eligibility Criteria For engineering

Basic Qualification

Candidates must have passed **Higher Secondary (10+2)** or equivalent

Must have studied:

- Physics

- Chemistry ○

Mathematics

Minimum Marks

- Candidates should secure the **minimum percentage** as prescribed by government/AICTE norms
- Relaxation may be applicable for reserved categories as per rules

Other Requirements

- Must satisfy **age criteria** set by authorities
- Must be an **Indian citizen** (except NRI quota applicants)

Admission Process

Application

- Submit application through:
 - **KEAM (Kerala Engineering Entrance Exam)** OR ○ Direct application (management quota)

Entrance Examination for Managment

- Appear for KEAM conducted by the state government
- Rank obtained plays a key role in seat allotment

Merit List & Allotment

- Seats are allotted based on: ○ Entrance rank ○ Academic performance ○ Reservation policies

Document Verification

- Candidates must submit: ○ Mark sheets

- Transfer Certificate ○

ID proof ○

Entrance scorecard

Admission Confirmation

- Payment of fees
- Final seat confirmation

NRI Quota Admission

Overview

The college provides admission under the **NRI (Non-Resident Indian) quota** for students sponsored by relatives working abroad.

Eligibility for NRI Quota

- Must meet **basic academic qualification (10+2 with PCM)**
- Should have an **NRI sponsor** (parent/relative)
- Submission of:
 - Passport copy ○
 - Visa details ○
 - Sponsorship certificate

Curriculum Design and Academic Framework

The Holy Grace Academy of Engineering is affiliated with APJ Abdul Kalam Technological University (KTU), which regulates the curriculum, academic structure, and evaluation system. The institution strictly follows the university guidelines while also incorporating additional industry-oriented components to enhance student competency.

Curriculum Design

University-Based Curriculum

- The core syllabus is designed by KTU
- Ensures **uniform academic standards** across affiliated colleges
- Covers:
 - Fundamental engineering concepts
 - Core subjects
 - Electives and interdisciplinary topics

Industry-Oriented Add-ons

- Value-added courses to bridge the **industry-academia gap**
- Skill development programs such as:
 - Programming and coding skills
 - Communication and soft skills
 - Emerging technologies (AI, IoT, Data Science)

Practical Learning Focus

- Laboratory sessions aligned with theory subjects
- Mini projects and main projects
- Workshops, seminars, and technical training programs

Academic Framework

Semester System

- Follows a **semester-based system** as per KTU
- Each academic year is divided into:
 - Two semesters
- Continuous learning and evaluation

Evaluation System

- **Internal Assessment (IA):**
 - Assignments
 - Class tests
 - Attendance
- **External Examination:**
 - Conducted by KTU at end of semester

Grading System

- Credit-based grading system (CGPA)
- Performance evaluated based on:
 - Theory exams
 - Practical exams
 - Project work

Teaching and Learning Methods

Classroom Teaching

- Smart classrooms and digital learning tools
- Interactive teaching methods

Student-Centered Learning

- Group discussions
- Case studies
- Problem-solving sessions

Exposure and Training

- Industrial visits (India & abroad)
- Internships and in-plant training
- Guest lectures by industry experts

Skill Development and Outcome-Based Education

- Focus on **Outcome-Based Education (OBE)**

- Development of:
 - Technical knowledge
 - Analytical thinking
 - Communication skills
 - Teamwork and leadership

Continuous Improvement

- Regular syllabus updates as per KTU guidelines
- Feedback from:
 - Students
 - Faculty
 - Industry experts
- Implementation of modern teaching practices

Teaching and Learning Methodology (way of teaching)

The Holy Grace Academy of Engineering adopts a modern and student-centered teaching and learning methodology that aligns with the academic guidelines of APJ Abdul Kalam Technological University. The institution focuses on creating an interactive, practical, and outcome-based learning environment that enhances both theoretical understanding and realworld application of knowledge.

Teaching Methods:

-

Classroom Teaching:

- Use of **smart classrooms** and digital tools
- Interactive lectures with audio-visual aids
- Concept-based teaching rather than rote learning

Interactive Learning:

- Group discussions and seminars
Question–answer sessions
- Case study analysis to improve problem-solving skills

Outcome-Based Education (OBE):

- Focus on achieving specific learning outcomes
- Continuous assessment of student performance
- Alignment of teaching methods with industry requirements

Practical Learning Approach:**Laboratory Sessions:**

- Well-equipped labs for hands-on experience
- Experiments aligned with theoretical subjects

Project-Based Learning:

- Mini projects in early semesters
- Final year main project focusing on real-world problems

Industrial Exposure:

- Industrial visits within India and abroad
- Internships and in-plant training
- Guest lectures by industry experts

-

Evaluation and Assessment:**Continuous Internal Evaluation:**

- Assignments and tutorials
- Internal tests and quizzes
- Attendance and participation

Semester-End Examination:

- Conducted by APJ Abdul Kalam Technological University includes theory and practical exams

Skill Development:

- Training in:
 - Communication skills
 - Technical skills
 - Soft skills and personality development
- Workshops on emerging technologies
- Career-oriented programs

Use of Technology:

- E-learning platforms and digital resources
- Online assignments and assessments
- Access to digital libraries and study materials

Continuous Improvement:

- Feedback from students and faculty
- Updating teaching strategies regularly
- Incorporation of innovative teaching techniques

•

Examination and Evaluation System

The Holy Grace Academy of Engineering follows a systematic and transparent examination and evaluation system as prescribed by APJ Abdul Kalam Technological University (KTU). The system is designed to assess students continuously and comprehensively, ensuring a balance between theoretical knowledge, practical skills, and overall academic performance.

Structure of Evaluation:

Continuous Internal Evaluation (CIE or internal marks):

- Conducted by the institution during the semester
- Components include:
 - Internal examinations (series tests)
 - Assignments and tutorials
 - Quizzes and seminars
 - Attendance and class participation

End Semester Examination (ESE main exam):

- Conducted by APJ Abdul Kalam Technological University
- Evaluates overall understanding of subjects
- Includes both **theory and practical examinations**

Marks Distribution:

- Internal Assessment: **Typically 40%**
- External Examination: **Typically 60%**
- Exact distribution may vary as per KTU regulations

Practical and Project Evaluation:

Usually third year (3rd) have mini project and fourth year (4th) have main project

Laboratory Exams:

- Continuous lab assessment
- Final practical examination conducted at semester end

Project Work:

- Evaluation based on: ○ Project reviews ○ Viva voce ○ Final report and presentation
- Grading System:**

- Follows a **credit-based grading system (CGPA)**
- Grades are assigned based on performance:
 - O (Outstanding) ○ A+ / A /
 - B+ / B / C / P (Pass) ○ F (Fail)

Transparency and Fairness:

- Evaluation is conducted under strict university guidelines
- Answer scripts are centrally evaluated
- Provision for:
 - Revaluation ○
 - Scrutiny of answer papers

Academic Monitoring:

- Regular tracking of student performance
- Identification of slow learners
- Remedial classes and support programs

Continuous Improvement:

- Feedback-based improvements in evaluation methods
- Updates as per university norms
- Focus on outcome-based assessment

Grading System and CGPA (Simple Explanation)

The Holy Grace Academy of Engineering follows the grading system of APJ Abdul Kalam Technological University (KTU). Instead of showing only marks, students are given **grades** like S, A+, A, B+, B, C, and P based on their marks. Each grade has a **grade point** (for example: S = 10, A+ = 9, A = 8.5). If a student gets below 40 marks, they fail (F grade).

Each subject has some **credits** based on its importance. To calculate performance, the university uses **SGPA** and **CGPA**.

- **SGPA (Semester Grade Point Average)** shows performance in one semester
- **CGPA (Cumulative Grade Point Average)** shows overall performance in all semesters

Faculty Profile and Qualifications

The Holy Grace Academy of Engineering has a team of highly qualified, experienced, and dedicated faculty members who play a key role in delivering quality technical education. The institution maintains a balanced mix of senior professors, associate professors, and assistant professors across all departments to ensure effective teaching and academic guidance.

The college has approximately **100–150 faculty members** (can vary slightly each year), distributed among various engineering departments such as Civil Engineering, Computer Science Engineering, Electronics and Communication Engineering, and Electrical and Electronics Engineering. This adequate faculty strength helps maintain a good **student–teacher ratio**, allowing personalized attention and better academic support for students.

Most of the faculty members possess **postgraduate qualifications (M.Tech/M.E.)**, and many have completed or are pursuing **doctoral degrees (Ph.D.)** in their respective fields. The institution also includes faculty members who have graduated from reputed institutions such as IITs, NITs, and other recognized universities in India. Their academic background and industry exposure contribute to delivering both theoretical knowledge and practical insights.

In addition to academic qualifications, faculty members regularly participate in **faculty development programs (FDPs)**, workshops, seminars, and conferences to update their knowledge and stay aligned with the latest technological advancements. They are encouraged to engage in **research activities**, publish papers in national and international journals, and undertake funded research projects.

The teaching staff adopts modern teaching methodologies, including smart classroom teaching, project-based learning, and outcome-based education as prescribed by APJ Abdul Kalam Technological University. Faculty members also act as mentors, guiding students in academic matters, career planning, and personal development.

Furthermore, the institution ensures continuous performance evaluation of faculty through feedback from students, peer reviews, and academic audits. This helps in maintaining high teaching standards and improving the overall quality of education.

Overall, the faculty at Holy Grace Academy of Engineering are well-qualified, experienced, and committed to nurturing students into skilled engineers and professionals.

Research and Development Activities

The Holy Grace Academy of Engineering actively promotes a strong research culture among faculty and students to enhance innovation, technical knowledge, and problem-solving skills. The institution encourages both theoretical and applied research in various engineering domains aligned with current industry and societal needs.

Faculty members are involved in **research activities** such as publishing papers in national and international journals, presenting at conferences, and participating in seminars and workshops. Students are also motivated to take part in research through **final year projects, mini projects, and technical competitions**, which often address real-world problems.

The institution organizes **research-oriented programs** including:

- Workshops and training sessions on emerging technologies
- Faculty Development Programs (FDPs)
- Technical seminars and symposiums
- Guest lectures by experts from academia and industry

Innovation and Development:

- Encouragement for **interdisciplinary projects**
- Focus on areas like:
 - Artificial Intelligence
 - Internet of Things (IoT)
 - Renewable Energy
 - Data Science
- Support for **prototype development and practical implementation** •
Collaboration with industries for applied research

Funded Projects:

The institution supports and encourages faculty members and students to apply for **funded research projects** from various government and private agencies such as:

- All India Council for Technical Education
- Department of Science and Technology
- Kerala State Council for Science Technology and Environment

Key Aspects of Funded Projects:

- Financial assistance for research and development
- Support for purchasing equipment and materials
- Opportunities for innovation and patent development
- Encouragement for student participation in funded projects

Research Output:

- Publication of research papers in reputed journals
- Participation in national and international conferences
- Development of innovative project models
- Contribution to technical advancements and community development

Collaboration and Industry Interaction:

- Industry-academia collaboration for research
- Internship-based research exposure
- Real-time problem-solving projects with industry partners

Continuous Improvement:

- Encouraging faculty to pursue **Ph.D. and higher studies**
- Regular review of research activities
- Adoption of new technologies and research methods

Library and Learning Resources

The Holy Grace Academy of Engineering has a well-equipped and resourceful library that supports the academic and research needs of students and faculty. The library serves as a central hub for knowledge, providing access to a wide range of printed and digital learning materials.

The library houses **thousands of books (approximately 10,000–20,000 volumes)** covering various disciplines such as engineering, technology, science, management, and general studies. It includes textbooks, reference books, encyclopedias, journals, and magazines that are regularly updated to match the syllabus prescribed by APJ Abdul Kalam Technological University.

In addition to printed materials, the institution provides access to a **digital library**, enabling students and faculty to use e-resources such as e-books, e-journals, research papers, and online databases. Students can access digital content through computers available in the library as well as through institutional login facilities.

The library subscribes to various **national and international journals and periodicals**, helping users stay updated with the latest developments in technology and research. It also provides access to **online learning platforms and databases** that support academic projects, assignments, and research work.

The library is designed with a **spacious and peaceful reading environment**, including reading halls, reference sections, and separate areas for faculty and students. It follows a systematic arrangement of books using classification and cataloging methods, making it easy to locate resources.

Additional facilities include:

- Computer systems with internet access
- Book lending and reference services
- Digital catalog (OPAC) for easy search of books
- Reprography (photocopy/printing) services
- Access to previous year question papers and project reports

The institution also promotes **self-learning and continuous education** by encouraging students to make effective use of library resources. Orientation programs are conducted to help students understand how to use library facilities efficiently.

Laboratory and Technical Facilities

The Holy Grace Academy of Engineering provides well-equipped laboratories and modern technical facilities to support practical learning and skill development. The institution emphasizes hands-on training to complement theoretical knowledge, ensuring that students gain real-world technical experience.

Each department has **specialized laboratories** designed according to the curriculum prescribed by APJ Abdul Kalam Technological University. These labs are equipped with the necessary instruments, tools, and machines required for conducting experiments and project work.

Laboratory Facilities:

Department-wise Labs:

- **Civil Engineering Labs:**

- Structural Engineering Lab ○
 - Geotechnical
 - Engineering Lab ○
 - Surveying Lab ○
 - Environmental
 - Engineering Lab
- **Computer Science Labs:** ○ Programming Lab ○ Data Structures Lab ○
 - Database Management Lab ○ Networking Lab
- **Electronics & Communication Labs:**
 - Electronics Devices Lab ○
 - Communication Lab ○
 - Microprocessor and
 - Embedded Systems Lab
- **Electrical & Electronics Labs:**
 - Electrical Machines Lab
 - Power Systems Lab ○
 - Control Systems Lab

Equipment Availability:

- Modern and calibrated laboratory equipment
- Advanced instruments for testing and analysis
- Regular maintenance and upgrades of equipment
- Sufficient quantity of equipment to ensure **individual or group practice** •
- Safety measures and guidelines followed in all labs

Software Tools and IT Facilities:

The institution provides access to various **licensed software tools** to enhance technical skills, including:

- Programming tools: ○ C, C++, Java, Python
- Engineering software:
 - AutoCAD ○ MATLAB
 - Simulation tools
- Database and development tools:
 - SQL-based software ○

Web development tools

- Operating systems and networking tools

Students are given hands-on experience in using these tools for academic work, projects, and research.

Additional Technical Facilities:

- High-speed internet connectivity across labs
- Computer centers with updated systems
- Smart classrooms with digital teaching aids
- Wi-Fi enabled campus
- Access to online technical resources and virtual labs

Practical Learning Support:

- Mini projects and final year projects using lab facilities
- Workshops and technical training sessions
- Support for innovation and prototype development

Maintenance and Upgradation:

- Regular inspection and calibration of equipment

- Upgrading labs as per technological advancements
- Feedback-based improvement of facilities

Information Technology Infrastructure

The Holy Grace Academy of Engineering has a well-developed Information Technology (IT) infrastructure that supports academic activities, research, administration, and communication across the campus. The institution ensures that students and faculty have access to modern computing resources and digital tools to enhance the teaching–learning process.

The campus or collage is equipped with multiple **computer labs and centralized computing facilities**, featuring updated systems with required hardware configurations. These systems are installed with necessary software tools and are regularly maintained and upgraded to meet academic and industry standards. The IT infrastructure also supports online learning, project development, and research activities.

Wi-Fi Connectivity:

The entire campus is enabled with **high-speed Wi-Fi connectivity**, providing seamless internet access to students, faculty, and staff. The network is designed to ensure reliable and secure connectivity across:

- Academic blocks
- Laboratories
- Library
- Administrative offices
- Common areas and hostels (where applicable)

The Wi-Fi network allows users to access:

- E-learning platforms
- Digital library resources
- Online journals and research databases
- Virtual labs and cloud-based tools

Students can use Wi-Fi for academic purposes such as attending online classes, submitting assignments, coding, and research work.

Network and Server Facilities:

- Centralized server system for data management
- Secure network infrastructure with firewalls and monitoring
- LAN connectivity in laboratories and departments
- Backup systems to ensure data safety

Security and Access Control:

- User authentication for Wi-Fi access
- Controlled bandwidth usage
- Protection against unauthorized access
- Regular monitoring of network performance

IT Support and Maintenance:

- Dedicated IT support team
- Regular system updates and troubleshooting
- Maintenance of hardware and software resources

Additional Features:

- Smart classrooms with internet-enabled teaching tools
- Online communication platforms for students and faculty
- Support for digital exams and online assessments

Campus Infrastructure and Facilities

The Holy Grace Academy of Engineering provides a well-developed and modern campus infrastructure that supports both academic and extracurricular activities. The institution is designed to create a comfortable, safe, and student-friendly environment that enhances learning and overall development.

Classrooms:

The classrooms are spacious, well-ventilated, and designed to provide a comfortable learning atmosphere. They are equipped with:

- Smart boards and LCD projectors
- Audio-visual teaching aids
- Proper seating arrangements
- Good lighting and ventilation

These facilities support **interactive and technology-enabled learning**, making classes more effective and engaging.

Seminar Halls and Auditorium:

The campus includes well-equipped seminar halls and an auditorium used for:

- Workshops and seminars
- Guest lectures
- Conferences and presentations
- Cultural and academic events

These halls are equipped with:

- Modern audio-visual systems
- Projectors and sound systems
- Comfortable seating arrangements

They provide a platform for students to improve communication and presentation skills.

Hostel Facilities:

The institution provides separate hostel facilities for boys and girls with a safe and comfortable environment. Key features include:

- Well-furnished rooms
- Hygienic food in mess facilities
- 24/7 security and supervision
- Wi-Fi connectivity (where applicable)
- Recreational and study areas

The hostels ensure a homely atmosphere that supports both academic focus and personal well-being.

Cafeteria and Dining:

- Hygienic and spacious cafeteria
- Availability of nutritious and affordable food
- Clean dining environment

Sports and Recreation:

-

Facilities for indoor and outdoor games

- Playground for sports activities
- Encouragement for physical fitness and team spirit

Health and Safety:

- Basic medical facilities and first aid
- Nearby hospitals for emergency care
- Campus security with CCTV surveillance
- Fire safety measures

Transport and Parking:

- Well-connected transport facilities
- College buses for students and staff
- Adequate parking space for vehicles

Eco-Friendly Campus:

- Green and clean surroundings
- Landscaped gardens and open spaces
- Pollution-free environment for peaceful learning

Student Support Services

The Holy Grace Academy of Engineering provides a wide range of student support services aimed at enhancing academic success, personal development, and career readiness. The institution ensures that students receive proper guidance, counseling, and support throughout their academic journey.

Career Guidance and Placement Support:

- Dedicated **Training and Placement Cell**
- Career guidance programs to help students choose suitable career paths

- Training in:
 - Aptitude and reasoning ◦
 - Technical skills ◦ Communication
 - and soft skills
- Resume preparation and interview training
- Mock interviews and group discussions
- Campus recruitment drives with reputed companies

Counseling Services:

- Professional counseling for: ◦ Academic stress ◦ Personal issues ◦
Emotional well-being
- Mentoring system where faculty guide students individually
- Support for improving confidence and motivation
- Regular interaction between students and mentors

Academic Support:

- Remedial classes for slow learners
- Special coaching for difficult subjects
- Doubt-clearing sessions
- Access to library and digital learning resources

Skill Development Programs:

- Workshops on emerging technologies
- Personality development programs
Leadership and teamwork training
- Entrepreneurship development programs

-

Student Development Activities:

- Participation in seminars, conferences, and technical events
- Encouragement for innovation and project work
- Support for internships and industrial training

Health and Well-being Support:

- Basic medical facilities on campus
- Awareness programs on health and wellness
- Safe and secure campus environment

Scholarships and Financial Support:

- Guidance for scholarships and financial aid
- Support for eligible students under government schemes

Feedback and Grievance Redressal:

- System for student feedback on academics and facilities
- Grievance redressal cell for resolving student issues
- Continuous improvement based on feedback

Scholarships and Financial Assistance:

The Holy Grace Academy of Engineering provides various scholarships and financial assistance schemes to support students from different economic backgrounds. The institution ensures that deserving and meritorious students are not deprived of education due to financial constraints.

Government Scholarships:

Students can avail scholarships offered by the Government of India and the Government of Kerala, such as:

- Merit-based scholarships for academically excellent students
- Scholarships for students belonging to SC/ST/OBC categories
- Minority scholarships for eligible communities
- Post-matric scholarships and central sector schemes

The institution provides guidance and support for applying to these schemes.

Institutional Scholarships

- Scholarships for **high academic performers**
- Fee concessions for students with outstanding entrance ranks (KEAM)
- Awards and incentives for university toppers and achievers

Financial Assistance:

- Financial aid for economically weaker students
- Support through installment-based fee payment options
- Assistance in applying for **education loans** from banks

NRI and Special Category Support:

- Separate admission under NRI quota
- Guidance for international students
- Support services for students from diverse backgrounds

Fee Concessions:

Partial fee waivers for:

- - Economically weaker sections
 - Students with excellent academic performance
- Special consideration in genuine financial hardship cases
- Concessions based on institutional policies and eligibility

Additional Support:

- Assistance in documentation for scholarships
- Awareness programs about available financial schemes
- Continuous follow-up to ensure students receive benefits

Transparency and Fairness:

- Proper verification of eligibility criteria
- Fair distribution of scholarships and concessions
- Monitoring of financial assistance programs

Placement and Career Development Cell

The Holy Grace Academy of Engineering has an active and well-organized **Placement and Career Development Cell** that focuses on preparing students for successful careers in industry and higher studies. The cell acts as a bridge between students and employers by organizing training programs, recruitment drives, and career guidance activities.

Objectives of the Placement Cell:

- Enhance **employability skills** of students
- Provide **career guidance and counseling**
- Facilitate campus recruitment opportunities
- Build strong **industry–institution interaction**

Training and Skill Development:

The placement cell conducts various training programs to prepare students for recruitment:

- Aptitude and reasoning training
- Technical skill development (core and IT fields)
- Communication and soft skills training
- Resume writing and personality development
- Mock interviews and group discussion sessions

Recruitment Process:

The recruitment process followed in the institution generally includes:

1. **Company Invitation** ○ Companies are invited through the placement cell
2. **Pre-Placement Talk (PPT)** ○ Company representatives introduce their organization, roles, and expectations
3. **Application and Screening** ○ Students apply based on eligibility criteria ○ Shortlisting based on academic performance
4. **Selection Rounds** ○ Aptitude test ○ Technical interview ○ HR interview
5. **Final Selection** ○ Selected candidates receive offer letters

Placement Statistics (General Overview):

- Good percentage of students placed every year

-

Opportunities in: ○ IT companies ○

Core engineering sectors ○

Management and service

sectors

- Increasing placement trends due to training and industry collaboration

Key Highlights:

- Participation of reputed companies in campus drives
- Improvement in average salary packages over the years
- Opportunities for internships leading to full-time jobs

Career Development Support:

- Guidance for higher studies (M.Tech, MBA, etc.)
- Support for competitive exams
- Entrepreneurship development programs
- Industry interaction through seminars and workshops

Industry Collaboration:

- MoUs with companies for training and placement
- Industrial visits and internships
- Guest lectures by industry professionals

Continuous Improvement:

- Feedback from recruiters
- Updating training programs based on industry needs
- Focus on emerging technologies and skills

Internship and Industrial Collaboration

The Holy Grace Academy of Engineering places strong emphasis on **practical training and industry exposure** to bridge the gap between academic learning and real-world applications. The institution actively collaborates with industries and organizations to provide students with hands-on experience and professional insights.

Internship Programs:

- Mandatory internships as part of the curriculum (as per APJ Abdul Kalam Technological University guidelines)
- Opportunities for internships in:
 - IT companies ○ Core engineering industries ○ Research organizations
- Summer and winter internship programs
- Exposure to real-time projects and industry practices

Industrial Collaboration:

- Collaboration with industries through **MoUs (Memorandums of Understanding)**
- Industry partnerships for:
 - Training programs ○ Workshops and seminars ○ Joint research activities
- Guest lectures by industry experts
- Industry participation in curriculum enrichment

Practical Training:

- In-plant training in companies and industries

-

- Hands-on training in:

- Manufacturing processes ○

- Software

- development

- Electrical and electronic systems
- Real-world problem-solving experience

Industrial Visits:

- Organized visits to industries within India and abroad
- Helps students understand:
 - Industrial operations
 - Production processes
 - Quality control systems

Skill Enhancement:

- Development of:
 - Technical skills
 - Communication skills
 - Teamwork and leadership
- Exposure to latest technologies and tools

Benefits of Industry Exposure:

- Improves employability
- Enhances practical knowledge
- Builds industry readiness
- Helps in better career decision-making

Continuous Industry Interaction:

- Regular interaction with industry professionals
- Feedback from industries to improve training programs
- Alignment with current industry requirements

.

Extra-curricular Activities

The Holy Grace Academy of Engineering strongly promotes extracurricular activities as an essential part of student development. The institution believes that participation in sports, cultural events, and artistic activities helps students develop physical fitness, creativity, teamwork, and leadership qualities alongside academic excellence.

Sports Activities:

- Facilities for both **indoor and outdoor games**
- Outdoor sports:
 - Football ○ Cricket
 - Volleyball ○ Athletics
- Indoor games: ○ Chess ○ Carrom ○ Table tennis
- Regular sports meets and competitions
- Participation in **inter-college and university-level tournaments**
- Encouragement for physical fitness and team spirit

Cultural Activities:

- Annual cultural fest and college day celebrations
- Participation in:
 - Dance competitions ○
 - Music (solo and group
 - performances) ○ Drama
 - and skits
- Celebration of national festivals and important days
- Cultural clubs and student associations
- Opportunities to showcase talent at inter-college events

Arts and Creative Activities:

- Drawing, painting, and craft competitions
- Photography and design activities

- Literary activities such as:
 - Essay writing
 - Debate competitions
 - Poetry and storytelling
- Participation in arts festivals and exhibitions
- Encouragement for creative thinking and innovation

Personality Development through Activities:

- Improves confidence and self-expression
- Enhances leadership and teamwork skills
- Develops time management and discipline
- Provides stress relief and mental well-being

Student Participation and Recognition:

- Awards and certificates for winners
- Recognition of talents at college and university level
- Motivation for students to actively participate

Alumni Association

The Holy Grace Academy of Engineering has an active and well-connected Alumni Association that plays an important role in strengthening the relationship between former students and the institution. The alumni network acts as a valuable resource for current students by sharing knowledge, experience, and career opportunities.

Alumni Network:

-
- Strong network of alumni working in:
 - IT companies
 - Core engineering industries
 - Government sectors
 - Entrepreneurial ventures
- Alumni placed in reputed organizations across India and abroad
- Platform for connecting past and present students
- Database of alumni for communication and collaboration

Alumni Engagement Activities:

- Regular alumni meets and reunions
- Guest lectures and interactive sessions by alumni
- Alumni participation in seminars, workshops, and conferences
- Mentorship programs for students
- Sharing of industry insights and career guidance

Career Support through Alumni:

- Referral opportunities for internships and placements
- Guidance on higher studies and competitive exams
- Networking opportunities with industry professionals
- Support for entrepreneurship and startup ideas

Contribution to Institution:

- Alumni involvement in academic development
Suggestions for curriculum improvement
- Support in placement activities
- Contribution to institutional growth and reputation

Student–Alumni Interaction:

- Direct interaction between students and alumni
- Experience sharing sessions
- Motivation and career awareness programs

Continuous Engagement:

- Online platforms (social media, alumni portals) for communication
- Regular updates and newsletters
- Encouraging alumni participation in institutional activities

Quality Assurance and Accreditation

The Holy Grace Academy of Engineering is committed to maintaining high standards of education through continuous quality improvement and adherence to national accreditation norms. The institution follows structured quality assurance mechanisms to ensure excellence in teaching, learning, research, and overall institutional performance **Quality Assurance System:**

- Implementation of **Internal Quality Assurance Cell (IQAC)**
- Regular academic audits and reviews
- Feedback collection from:
 - Students ○ Faculty
 - Alumni ○ Employers
- Continuous improvement in curriculum and teaching methods
- Adoption of **Outcome-Based Education (OBE)**

NAAC Accreditation:

The National Assessment and Accreditation Council is a government body that assesses and accredits higher education institutions in India based on quality standards.

Key Features of NAAC

- Evaluates institutions on:
 - Teaching–learning process
 - Infrastructure and facilities
 - Research and innovation
 - Student support services

-

Governance and leadership

- Provides grades such as:
 - A++, A+, A, B++, etc.
- Ensures overall institutional quality and accountability

Importance of NAAC:

- Enhances institutional reputation
- Improves quality of education
- Helps in securing funding and recognition
- Builds trust among students and stakeholders

NBA Accreditation:

The National Board of Accreditation focuses on **program-level accreditation**, especially for technical courses like engineering.

Key Features of NBA:

- Evaluates specific programs (e.g., Civil, CSE, ECE, EEE)
- Based on:
 - Course outcomes
 - Student performance
 - Faculty quality
 - Industry relevance
- Emphasizes **Outcome-Based Education (OBE)**

Importance of NBA:

Ensures quality of individual engineering programs

- Improves employability of graduates
- Aligns education with industry standards
- Recognized internationally

Continuous Quality Improvement:

- Regular updates in teaching methods
- Faculty development programs
- Upgradation of infrastructure and labs
- Industry collaboration for curriculum enhancement

Benefits of Accreditation:

- Recognition at national and international levels
- Improved academic and administrative standards
- Better placement opportunities for students
- Increased student admissions and trust

Code of Conduct and Discipline

The Holy Grace Academy of Engineering maintains a strict code of conduct and discipline to ensure a safe, respectful, and academically focused environment. Students are expected to follow institutional rules and uphold values such as integrity, responsibility, and professionalism.

Dress Code:

- Students must wear **decent and formal attire** within the campus
- Department-specific uniforms may be prescribed (if applicable)
- ID cards must be worn at all times inside the campus
- Avoid:
 - Casual or inappropriate clothing
 - Offensive prints or slogans
- Maintain a **neat and professional appearance**

Attendance Requirement:

- Minimum **75% attendance** is mandatory as per APJ Abdul Kalam Technological University guidelines
- Students with shortage of attendance may:

- - Be restricted from writing semester exams
 - Face academic penalties
- Medical leave must be supported with valid documents
- Regular attendance is essential for internal assessment marks

General Discipline Rules:

- Maintain punctuality in attending classes and academic activities
- Respect faculty, staff, and fellow students
- Follow classroom etiquette and avoid disruptions
- Maintain silence and discipline in library and labs

Prohibited Activities:

- Ragging is strictly prohibited (as per government regulations)
- No involvement in:
 - Substance abuse (alcohol, drugs, etc.)
 - Violence or misconduct
 - Malpractice during examinations
- Use of mobile phones may be restricted in classrooms

Campus Behavior:

- Maintain cleanliness and protect campus property
- Follow rules in laboratories and workshops
- Use facilities responsibly
- Adhere to safety guidelines

Security and Identification:

- Mandatory carrying of **college ID card**
- Entry and exit monitored for safety
- Visitors allowed only with permission

Disciplinary Actions:

- Warnings for minor violations
- Suspension or fines for serious misconduct
- Strict action for ragging and indiscipline

Student Responsibility:

- Uphold the reputation of the institution
- Maintain ethical behavior inside and outside campus
- Act responsibly in academic and social activities

Anti-Ragging Policy

The Holy Grace Academy of Engineering follows a **strict anti-ragging policy** in accordance with the guidelines of the University Grants Commission and relevant government regulations. The institution ensures a safe, respectful, and ragging-free environment for all students, especially freshers.

Strict Policies Against Ragging:

- Ragging in any form is **strictly prohibited** within the campus and hostels
- Zero-tolerance policy towards:
 - Physical harassment
 - Verbal abuse
 - Psychological intimidation
- Immediate disciplinary action for offenders, including:
 - Suspension or expulsion
 - Cancellation of admission

- - Legal action as per law

Anti-Ragging Committee:

- Formation of a dedicated **Anti-Ragging Committee**
- Includes:
 - Faculty members
 - Administrative staff
 - Student representatives
- Responsible for monitoring and preventing ragging activities

Monitoring and Prevention:

- Regular surveillance through:
 - CCTV cameras
 - Security personnel
- Surprise inspections in hostels and campus areas
- Strict supervision during initial months of admission

Awareness Programs:

- Orientation programs for freshers about anti-ragging rules
- Awareness campaigns highlighting:
 - Consequences of ragging
 - Student rights and responsibilities
- Posters, notices, and guidelines displayed across campus
- Workshops and seminars on maintaining a safe environment

Complaint and Support System:

- Easy reporting mechanisms for victims
- Confidential complaint system
- Anti-ragging helpline and support services
- Immediate response and action on complaints

Student Involvement:

- Encouragement for seniors to act as mentors
- Promoting friendly and supportive interaction

- Building a positive campus culture

Legal Framework:

- Strict adherence to anti-ragging laws
- Punishments as per government and University Grants Commission regulations •
Mandatory submission of anti-ragging affidavit by students

Safe Campus Environment:

- Ensuring dignity and respect for all students
- Promoting inclusiveness and equality
- Creating a stress-free and welcoming atmosphere

Environmental and Social Responsibility Initiatives

The Holy Grace Academy of Engineering is committed to promoting environmental sustainability and social responsibility among students and staff. The institution actively implements various initiatives to create awareness about environmental protection and encourages students to contribute positively to society.

Green Campus Initiatives:

- Development of a green and eco-friendly campus with trees, gardens, and landscaped areas
- Regular tree plantation drives involving students and staff
- Maintenance of clean and pollution-free surroundings
- Promotion of paperless communication through digital platforms • Use of energy-efficient lighting systems such as LED lights

Waste Management:

- Proper waste segregation into biodegradable and non-biodegradable waste
- Installation of waste disposal systems and dustbins across campus
- Awareness programs on recycling and waste reduction

-

Initiatives to reduce plastic usage within the campus

Water Conservation:

- Rainwater harvesting systems (where applicable)
- Efficient water usage practices
- Awareness programs on water conservation
- Maintenance of clean water sources

Energy Conservation:

- Use of energy-saving electrical equipment
- Encouraging minimal use of electricity
- Awareness campaigns on energy conservation
- Exploring renewable energy sources such as solar power

Environmental Awareness Programs:

- Seminars and workshops on environmental protection
- Celebration of environmental days such as:
 - World Environment Day ◦
 - Earth Day
- Student participation in eco-clubs and green initiatives

Social Responsibility Activities:

- Community service programs and outreach activities
- Blood donation camps and health awareness drives
- Support for social causes and charity activities
- Participation in rural development and awareness programs

Sustainable Practices:

- Encouraging eco-friendly habits among students
- Promoting use of reusable materials

Clean campus campaigns

- Green audits and environmental monitoring

Benefits of Initiatives:

- Creates environmental awareness among students
- Promotes sustainable living practices
- Improves campus cleanliness and health
- Encourages social responsibility and civic sense

Safety and Security Measures

The Holy Grace Academy of Engineering ensures a safe and secure environment for students, faculty, and staff through well-planned safety systems and strict security measures. The institution prioritizes the physical safety, well-being, and protection of everyone on campus.

CCTV Surveillance:

- Installation of **CCTV cameras** at key locations across the campus
- Continuous monitoring of:
 - Academic blocks
 - Corridors and entry/exit points
 - Hostels and common areas
- Helps in preventing unauthorized activities and maintaining discipline
- Recorded footage used for monitoring and investigation when required

Security Personnel:

- Trained security guards stationed at:
 - Main entrance and exit gates
 - Important campus locations
- 24/7 security services to ensure constant monitoring
- Verification of visitors and vehicles entering the campus
- Maintenance of entry and exit records

-

Safety Guidelines:

- Strict adherence to safety rules in laboratories and workshops
- Mandatory use of safety equipment where required
- Display of safety instructions and emergency procedures
- Regular awareness programs on safety practices

Access Control:

- Controlled entry with **ID card verification**
- Restricted access to sensitive areas
- Visitor management system with prior permission

Fire Safety Measures:

- Installation of fire extinguishers at key points
- Fire safety training and drills for students and staff
- Emergency exits clearly marked
- Regular inspection of fire safety equipment

Emergency and Health Support:

- Availability of first aid facilities on campus
- Quick access to nearby hospitals
- Emergency response system for accidents or health issues

Laboratory Safety:

- Supervision during lab sessions
- Proper handling of equipment and chemicals
- Safety instructions before conducting experiments

Digital and Cyber Safety:

- Secure IT systems and network protection
- Controlled internet access

- Awareness on safe use of digital resources

Continuous Monitoring and Improvement:

- Regular review of safety systems
- Feedback from students and staff
- Upgradation of security measures as needed

Future Development Plans

The Holy Grace Academy of Engineering is committed to continuous growth and development to meet the evolving demands of education and industry. The institution has planned several initiatives for future expansion in infrastructure, academic programs, and technological advancement.

Infrastructure Expansion:

- Construction of new academic blocks and classrooms
- Expansion of laboratory facilities with advanced equipment
- Development of modern research centers
- Improvement of library facilities with more digital resources
- Upgradation of hostel facilities and student amenities
- Enhancement of sports and recreational infrastructure

Introduction of New Courses:

- Launch of new undergraduate and postgraduate programs
- Introduction of courses in emerging fields such as:
 - Artificial Intelligence
 - (AI) ◦ Data Science ◦
 - Cyber Security ◦
 - Internet of Things (IoT)
- Skill-based and certification programs aligned with industry needs

Technological Advancement:

- Implementation of advanced IT infrastructure

- Expansion of digital learning platforms
- Smart classrooms with upgraded technology
- Integration of e-learning and virtual labs

Research and Innovation Development:

- Establishment of research and innovation centers
- Encouragement for funded research projects
- Collaboration with industries and research organizations
- Support for patents and startup initiatives

Industry Collaboration and Global Exposure:

- Strengthening partnerships with industries
- International collaborations and exchange programs
- Increased opportunities for internships and industrial training

Sustainable Development Initiatives:

- Expansion of green campus initiatives
- Use of renewable energy sources like solar power
- Environment-friendly infrastructure development

Student Development Initiatives:

- Enhanced placement training programs
- Career-oriented skill development courses
- Entrepreneurship and startup support programs

Continuous Quality Improvement:

- Pursuit of higher accreditation levels (NAAC/NBA)
- Regular curriculum updates as per industry trends
- Improvement based on feedback from stakeholders

Conclusion

In conclusion, the Holy Grace Academy of Engineering stands as a well-established institution committed to delivering quality technical education and fostering overall student development. The college provides a strong academic framework supported by experienced faculty, modern infrastructure, well-equipped laboratories, and advanced IT facilities. Through its structured curriculum under APJ Abdul Kalam Technological University, the institution ensures that students gain both theoretical knowledge and practical skills required for professional success.

The institution demonstrates excellence not only in academics but also in areas such as research and development, industry collaboration, internships, and placement support. The presence of an active placement cell, strong alumni network, and continuous training programs enhances students' employability and career readiness. Additionally, student support services, scholarships, and counseling systems ensure inclusive and holistic development.

Furthermore, the college emphasizes discipline, ethical values, environmental responsibility, and social awareness, creating a positive and safe learning environment. Initiatives such as anti-ragging policies, green campus practices, extracurricular activities, and community engagement contribute to shaping responsible and well-rounded individuals.

With continuous quality improvement through accreditation processes, adoption of modern teaching methodologies, and future-focused development plans, the institution remains dedicated to achieving higher standards of education. Overall, Holy Grace Academy of Engineering reflects a strong commitment to academic excellence, innovation, and the holistic growth of students, preparing them to meet global challenges and succeed in their professional careers.
